

econ live –

Instantaneous data in real-time

in addition to the econ4-Software

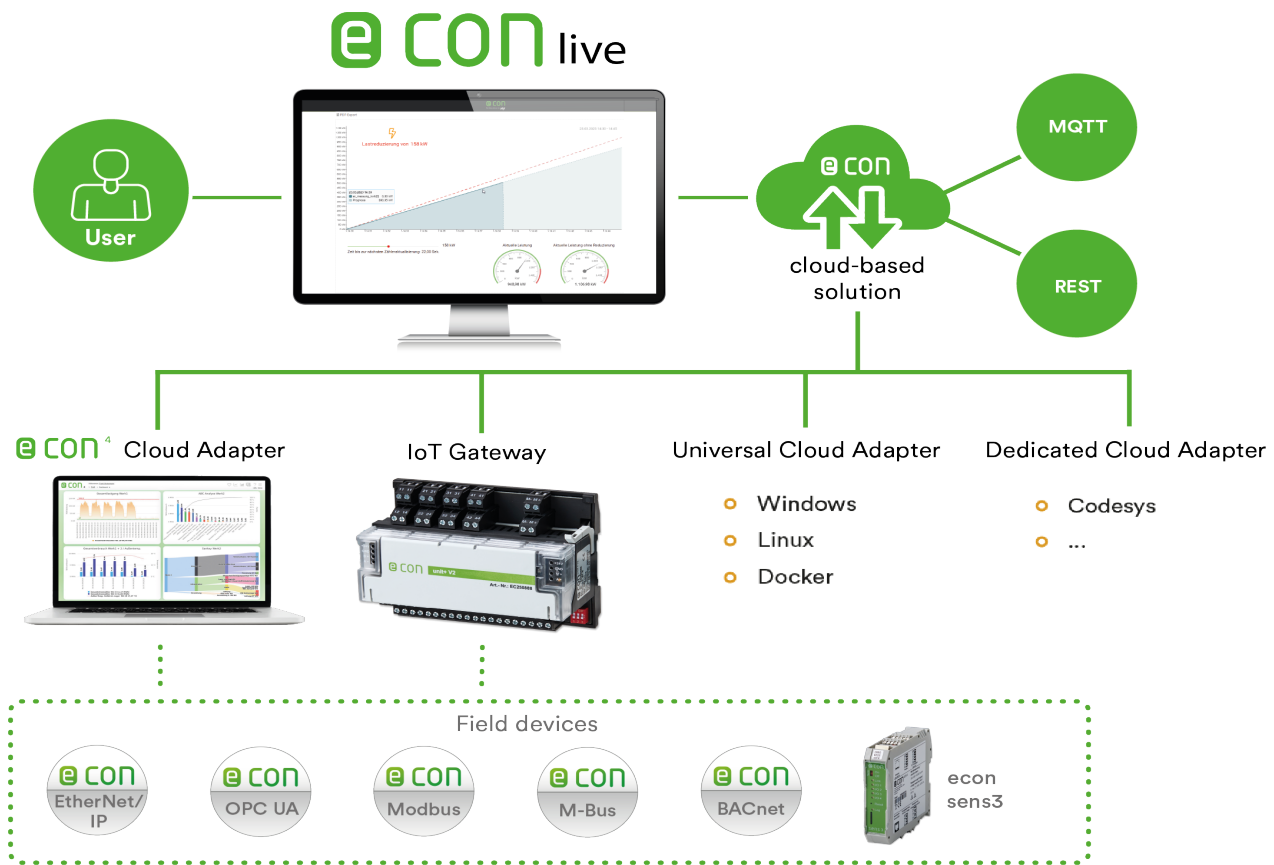

econ live provides the person responsible with an immediate picture of the current capacity utilization or process status by simply looking at the indicator instruments. Numerous measured values can now be displayed at any moment in real time on a PC, tablet or smartphone.

The cloud solution is intuitive to set up and operate. The econ live dashboard can be customized according to your wishes and requirements.

A product for:

- All econ4 users who require a display of instantaneous values
- Buildings, machines and systems in industry and commerce, in hospitals and many more

Simple and intuitive

Versions

econ live is available in different expansion stages. An upgrade to a higher level is possible at any time. One econ live is required per econ4 system.

- o EC_LIVE_25 econ live small - 25 data points
